## DESIGN FEATURES

### **BODY:**

Fabricated design. Internal gate wedges and guides for tighter shut off. Square or rectangular port design for higher flow capacity and minimal pressure drop. Internal design avoids any build up of solids that would prevent valve from closing.

### **GATE:**

Stainless steel gate as standard. Gate is polished on both sides to avoid jamming and seat damage.

### **PACKING:**

Long-life packing with several layers of braided fibre plus an EPDM o-ring (resilient valves), with an easy access packing gland ensuring a tight seal. Long-life braided packing is available in a wide range of materials.

### **STEM:**

The standard stainless steel stem offers a long corrosion resistant life. For rising stem handwheel actuators only, a stem protector is provided for additional protection against dust whilst the valve is in the open position.

### **ACTUATORS:**

All actuators supplied by ORBINOX are interchangeable, and supplied with an standard mounting kit for installation purposes on site.

### **YOKE or ACTUATOR SUPPORT:**

Made of EPOXY coated steel (stainless steel available on request). Compact design makes it extremely robust even under the most severe conditions.

### **EPOXY COATING:**

The epoxy coating on all ORBINOX cast iron and carbon steel valve bodies and components is electrostatically applied making the valves to be corrosion resistant with a high quality finished surface. The ORBINOX standard colour is RAL-5015 blue.

### **GATE SAFETY PROTECTION:**

ORBINOX automated valves are provided with gate guards in accordance with EU Safety Standards. The design feature prevents any objects from being trapped accidentally while the gate is moving.

## OTHER OPTIONS

### FLUSH PORTS:

- Allow for cleaning of solids trapped within the body cavities that can obstruct the flow or prevent the valve from closing
- Purging can be made with air, steam, liquids, etc. depending on the process

### SPECIAL DESIGNS:

- ORBINOX designs, produces and delivers special fabricated valves for special process conditions (big sizes, high pressures, material of construction, etc.)

### CAST BODIES:

- Standard material: GG25 and CF8M. Special alloys such as 254SMO, Hastelloys, ... also available upon request
